

SecureCertificate

SecureCertificate is a RFID enabled certificate embedded with an electronic chip which has the details of the student with photo, college details and the encrypted signature of the issuing authority.

SecureCertificate Solution

- Electronic storage of data pertaining to the student
- Capturing and storing photograph along with the other details of the student and the signature of the issuing authority.
- Module for Verification and Authentication of Certificates.
- Provision for cancellation or issuing duplicate e-Certificate
- Module for Enquiry, Monitoring and Reporting

SecureCertificate Features

- RFID enabled Embedded Chip inside the certificate
- 8kb memory chip with 13.56MHz frequency and ISO 14443A standards
- More secure & reliable
- 100% read accuracy
- Automated issuance of Certificate
- Minimised manual interference

Advantages of SecureCertificate

- Foolproof mechanism to verify and authenticate the certificate
- robust due to its contact less nature and globally unique Id of the embedded RFID chip
- Simplified access to information
- Easy Identification of counterfeit / fake certificates
- Reputation of the Institute / University
